n° 81-82

4eme trimestre 2003-1er trimestre 2004

Rexecode  
Centre de Recherches pour l'Expansion de l'Economie  
et le développement des Entreprises

---

Un centre d'études économiques indépendant  
ouvert aux entreprises

Créé en 1957, Rexecode est la première association française de recherches et d'études économiques privée et indépendante tournée vers l'entreprise. Rexecode est ouvert à toute entreprise ou organisation professionnelle soucieuse d'être directement et immédiatement informée des changements économiques en cours et de soutenir les objectifs de l'association. Rexecode compte aujourd'hui environ une centaine d'adhérents parmi les tous premiers groupes industriels ou financiers français.

#### Une veille conjoncturelle permanente

Rexecode assure une veille conjoncturelle permanente grâce à des données mises à jour et vérifiées quotidiennement, à des analyses régulières de la conjoncture et à une exploration des tendances probables de l'économie française et internationale. Les analyses des économistes de Rexecode font l'objet de documents écrits, adressés aux adhérents à des fréquences hebdomadaires, mensuelles, trimestrielles ou annuelles. Elles sont régulièrement présentées et discutées au cours de réunions de travail qui permettent un échange avec l'équipe de Rexecode mais aussi entre les adhérents.

#### Un regard d'entreprise sur la politique économique

Outre ses travaux d'analyse conjoncturelle, Rexecode est consulté en tant qu'expert au sein d'instances telles que le Groupe Technique de la Commission des Comptes de la Nation, les Commissions du Plan, les groupes GPA du Medef. Il intervient de la même manière auprès des pouvoirs publics et des commissions des assemblées parlementaires pour leur apporter une vision d'entreprise sur la politique économique. Il publie chaque trimestre certains de ses travaux dans la Revue de Rexecode.
